

Road Construction Ahead!

2015 Public Works Improvements Project

As part of this year's street improvements project, the Village of Waunakee will be reconstructing the following streets in your neighborhood this summer:

Fairview Court from West Street to the east end (alley)

The project has been bid and the Village Board has awarded the project to Parisi Construction, from Verona, Wisconsin. They will be working with various local subcontractors throughout the project. This newsletter contains some important information concerning the upcoming project and we encourage everyone to review it. Please keep it on hand to help answer questions you may have during the construction process that may soon be disrupting your normal activities.

SCHEDULED IMPROVEMENTS

The street reconstruction will consist primarily of the following improvements:

- Remove and replace the existing asphalt surface
- Remove and replace the existing roadway base (gravel)
- Remove and replace the existing curb and gutter
- Replace the existing water main, sanitary and add new storm sewers
- Install new concrete sidewalk and driveway aprons throughout the project
- Restore the disturbed area with grass seed, fertilizer, and mulch
- Install new street lighting throughout the project limits

CONSTRUCTION SCHEDULE

Construction activities are scheduled to begin in the next couple of weeks, and the project is anticipated to be completed by the end of July, weather permitting. Weekly project updates will be available on the Village of Waunakee website (<http://www.vil.waunakee.wi.us>) in the Engineering Department section or you can contact Jim Madden, Village Construction Manager using the contact information listed below.

Important Information

In order to accommodate the construction activities, the streets will be closed to thru traffic for the duration of the project and a "no parking" restriction will be in effect from 7:00am to 7:00pm daily for the duration of the project. The Contractor will make every effort to make the roadway passable to homeowners at the end of each day. However, there may be times when access to your property may not be possible. **Also, please be aware that travel within the construction zone will be at your own risk.**

Curb and gutter will be replaced throughout the project. In order to accommodate the new curb and gutter, driveway aprons will be removed and replaced. Temporary gravel will be placed to make the driveways accessible for most of the project. **However, driveways will NOT be accessible when the new concrete (curb, aprons, etc.) is poured and until it has had adequate time to cure.** Residents are encouraged to temporarily relocate any special vehicles such as boats, trailers, RVs, etc., before the construction project begins.

In preparation for the construction we ask that any landscaping or private underground utilities (such as an invisible dog fence, lawn sprinkling systems, special topsoil, decorative fencing, etc.) that may be located within or near the right-of-way (ROW) be removed and salvaged by the property owners. If you are not sure if it will interfere with the construction, please contact us.

All lawn and terrace areas that are disturbed during the construction will be restored with grass seed. We ask that you please water and maintain these areas as needed after they are restored to promote new growth.

Mail deliveries will continue as usual. Please contact the local U.S. Post Office if you have any questions regarding your mail.

Garbage pickup will continue as usual. Please contact Pellitteri Waste Systems at (608) 257-4285 with any questions regarding garbage pick-up.

You may be periodically notified of scheduled and emergency water service disruptions during the project, however if you experience any other unusual issues with your existing sewer or water services at any time during the project, please contact **Waunakee Utilities at (608) 849-8111.**
